## Temporary Blinds - Fitting Instructions

### Before you start you will need:

- A sharp pair of scissors
- Possibly a stanley knife
- That's it - simple!

Georgian windows - place a small piece of paper between the sticky part of blind & window frame to prevent any damage to paint work!

**Tip!**

- 1 Place the blind up to the window and if needed cut the width of the blind with a pair of sharp scissors. (Depending on how sharp your scissors are, you might need a stanley knife to trim the weighted batten along the bottom of your blind).
- 2 Peel off the strip on the top of the blind and stick the blind onto your window. It is advisable to place onto the glass rather than onto paint as when the blind is removed it may take some of the paint off as well.

**If you have PVC windows please DO NOT stick the blinds to the plastic.** The glue is designed for glass only and will prove very difficult to remove from other surfaces

- 3 Adjust the blinds, up or down, using the easy toggle adjuster.

### That's it!

When it's time to take the blinds down they are easy to remove and can be moved to another room, saved for the next decorating project or simply thrown away.
